TECHNICAL INFORMATION

Winch with a force up to 8500lb (3850 kg) is mounted onto the winch bracket.

Installation clearance of the winch:

1. Winch bracket.....	1 pcs.
2. Left bracket booster.....	1 pcs.
3. Right bracket booster.....	1 pcs.
4. Left adapter.....	1 pcs.
5. Right adapter.....	1 pcs.
6. Inner embedded part of the number.....	2 pcs.
7. Outer embedded part of the number....	2 pcs.
8. Embedded part M12.....	1 pcs.
9. Bolt M12x30.....	8 pcs.
10. Bolt M12x1,25x40.....	2 pcs.
11. Nut M12.....	8 pcs.
12. Washer 12.....	18 pcs.
13. Screw M6x50.....	4 pcs.

1. Open the bonnet.
2. Disconnect the negative battery terminal cable.

3. Remove caps of grille mount in upper side.

4. Remove caps of grille mount from left and right side.

5. Disconnect the front chamber.

6. Carefully dismantle the radiator grille by unlatching the latches at the bottom.

7. Remove the bumper clips.

8. Unscrew 2 self-tapping screws of the bumper clamp in arches on the left and right.

9. Unscrew 4 tension bolts of the bumper skirt center. Remove the bumper skirt center.

10. Unscrew 2 tension bolts of the bumper skirt side on the vehicle's left and right.

11. On the bumper inside unscrew 2 retaining nuts of the bumper skirt side and dismantle the bumper skirt side.

12. Carefully unbend plastic wheel arch covers on the vehicle's left and right, and unscrew self-tapping screws of the bumper clamp.

13. Dismantle the bumper. Pull the bumper edge by unlatching the latches, moving from the bumper edge to the center.

14. Disconnect the hose from the headlamp washer*.

**Make sure that the washing liquid tank is empty.*

15. Dismantle the dampers.

16. Remove the clips of plastic dust caps.

17. Dismantle plastic dust caps on the left and right.

18. Remove the air intake clips.
Dismantle the air intake.

19. Unscrew 4 tension bolts of the
frame booster. Dismantle the booster.

20. Unscrew 2 tension bolts of standard
towing eye. Dismantle the towing eye.

21. Insert embedded part M12 (pos. 8) into the frame on the left.

22. Install left frame booster (pos. 2) onto the vehicle frame and secure it to embedded part M12 (pos. 8), bolts M12x1,25x40 (pos. 10) and washers (pos. 12). Do not tighten screw joints.

23. Install right frame booster (pos. 3) onto the vehicle frame, secure with standard bolts with installation of standard towing eye. Do not tighten screw joints.

24. Install adapters (pos. 4 and 5) onto the vehicle frame using standard fasteners from the frame booster. Do not tighten screw joints.

25. Install the winch bracket (pos. 1) onto the vehicle. Secure to adapters and frame boosters using bolts M12x30 (pos. 9), nuts M12 (pos. 11) and washers (pos. 12). Adjust the winch bracket. Tighten all screw joints, including adapters and frame boosters.

26. Temporarily install standard bumper for pad eye hole spacing. Mark the hole for pad eye fasteners on the inside of the bumper along the winch bracket.
27. Remove the bumper.

28. Carefully cut out pad eye hole in standard bumper.

29. Remove the winch bracket from the vehicle, install the winch and pad eye onto the bracket and secure with bolts from the set of winch and pad eye.

30. Install the winch bracket onto the vehicle. See paragraph 25.

31. Install standard bumper.

32. Install the number embedded parts (pos. 6 and 7) onto the bumper grille using screws M6x50 (pos. 13).

33. Install number frame and radiator grille onto the vehicle.

Before starting operation with the winch installed on Rival winch bracket:

- make sure that all screw joints are tightened;
- check integrity of the winch control wiring.
